Order from OTS or SLA $1.60 63-18270

Trans. of Khim[icheskie] Volokna (USSR) 1962, no. 4, p. 37-41.

DESCRIPTORS: *Fibers (Synthetic), *Viscose, *Rayon, Driers (Apparatus).

A new uniform drying method is proposed which includes the use of air as a drying agent; zones in the drier with special preparation and circulation of the heat carrier; maintaining the certain specified conditions in the drier; circulation of air around both the internal and external cake surfaces by using hollow tubes or grids for holding the cakes in the carriers; and the use of optimal aerodynamic conditions

Trans. of Voprosy Filosofii (USSR) 1960, v. 14, no. 9, p. 132-142

In brief description here presented of the modifications to present day genetic theories, and in the historical and differentiated approach to the basic problems of genetic succession, there is now basis for the representatives of both opposing trends [i.e. "classical" genetics vs. the theories of Lysenko] for cooperation in investigations of the complex phenomena of heredity, a knowledge of the laws of which is so essential in practice and theory. Complete agreement on all problems is not required here. Let contending of opinions continue. (Author)
